

Compressor and airbank

Unit 15 | 16

General description

Compressor and airbank unit 15 and 16 are 8ft containers with a HP compressor and 14 x 80 litre @ 200 bar. An air distribution panel can divide the airbank to 2 sets of 7 x 80 litre with both content gauges and 2 separate hose connections for air distribution.

A central bail-out filling point is present and can be used without interrupting the use of the air banks.

All hose connections are provided with bleed valves and strain relief attaching points. Active ventilation and cooling grids are installed.

Main data

Length	2430 mm
Width	2185 mm
Height	2255 mm
Weight	3000 Kg
Power requirements	400V 50 Hz 12 KVA

Technical data

Compressor	Bauer KAP 450
Pressure	200 Bar
Volume	450 litre/min.
